

Flipkart Customer Service Analysis

Declining Retention - A Customer Service Problem?

Flipkart's customer retention is at risk. Every unhappy support interaction is a lost customer. This project analyses 30,000 customer calls to identify the root causes of poor satisfaction and recommend clear, actionable solutions.

Metric Tree

 **BUSINESS GOAL:** Improve Customer Retention

 **PRIMARY METRIC:** CSAT Score (Avg 5.54 / 10)

 **SENTIMENT**
51.8% Negative

• *Call Center Location*

 **RESPONSE TIME**
12.7% Above SLA

• *Contact Channel*

 **CALL DURATION**
Avg 25 mins

• *Call Reason*

Key Numbers at a Glance

30,000

Total calls analysed

Oct 2020

5.54/10

Avg CSAT Score

Out of 11,214 calls

51.8%

Calls with Negative Sentiment

15,526 frustrated customers

71.4%

Calls about Billing

21,410 of 30,000 calls

Hypothesis Results

H₁

Response Time → CSAT

NOT CONFIRMED

CSAT was almost the same across all SLA categories (5.52 to 5.60). Wait time alone did not predict satisfaction.

H₂

Sentiment → CSAT

✓ CONFIRMED

Strongest finding! CSAT ranged from 2.46 (Very Negative) to 9.49 (Very Positive). Sentiment IS CSAT.

H₃

Channel → Satisfaction

NOT CONFIRMED

All 4 channels scored nearly the same (~5.5 CSAT). The problem is not the channel - it's deeper.

H₄

Call Center → Performance

PARTIAL

Kolkata had the lowest CSAT (5.46) and most SLA breaches. Chennai led with CSAT 5.63.

H₅

Call Reason → Sentiment

NOT CONFIRMED

All 3 call reasons had similar negative rates (~51%). But Billing's 71% VOLUME is the real problem.

Finding 1 - Sentiment Drives CSAT

51.8% of all calls are Negative or Very Negative – this is the #1 problem

Very Negative

5,425 calls (18.1%)

CSAT: 2.46

Negative

10,101 calls (33.7%)

CSAT: 4.52

Neutral

8,003 calls (26.7%)

CSAT: 6.47

Positive

3,557 calls (11.9%)

CSAT: 8.00

Very Positive

2,914 calls (9.7%)

CSAT: 9.49

Invest in agent training & quality monitoring. Sentiment is the #1 level for CSAT improvement.

Finding 2 - Billing Calls Dominate

71.4%

Billing
Questions

21,410 of 30,000 calls

Billing Questions

21,410 (71.4%)

Payments

4,295 (14.3%)

Service Outage

4,295 (14.3%)

Why This Matters

Customers struggle to understand their bills.

This is not a support problem - it is a product design problem.

Fix: Clearer invoices + proactive SMS alerts + self-service portal.

Finding 3 - Call Center Performance

City	Total Calls	Volume	Avg CSAT	Above SLA	What it means
Delhi	12,531	41.8%	5.57	12.7%	Biggest center. Shows signs of strain under high volume.
Mumbai	10,002	33.3%	5.53	12.7%	Second largest. Consistent performance.
Kolkata	4,926	16.4%	5.46	12.9%	Lowest CSAT. Highest SLA breaches. Needs urgent review.
Chennai	2,541	8.5%	5.63	12.3%	Best CSAT. Smallest center. Learn from this model.

Kolkata has the lowest CSAT (5.46) & highest SLA breaches (12.9%). Audit and train urgently.

Top 3 Recommendations

1

Invest in Agent Training

51.8% of all calls are Negative/Very Negative sentiment - and sentiment DIRECTLY predicts CSAT

2

Fix Billing Experience

21,410 calls - that's 71% of all calls - were about billing. This is putting a huge load on the support team

3

Review Kolkata Call Center

Kolkata call center has the lowest CSAT (5.46) and highest Above SLA rate (12.9%)

Thank You!
